PRODUCT NEWS

Att. Kyle

Product: Mower Belts & Lift Links

Date: September 29, 1980

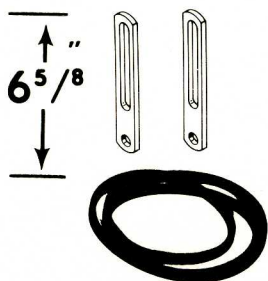

To: ALL OPE DEALERS

Beginning October 1, 1980, all Case 200 series, 400 series and loader tractors will be shipped with the appropriate belt and lift links for mounting a Case J40, J44, J45 or J46 rotary mower.

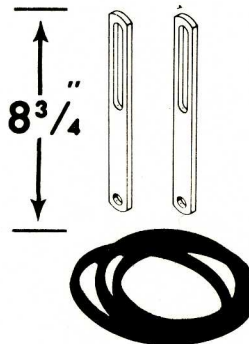

Concurrent with this change, we will no longer include belts and lift links with the above mower models. Please note that the J48, 60" rotary mower is excluded from the above J series mower model numbers and we will continue to include the correct belt and lift links with the packing of the J48 mowers.

A plastic parts bag shipped with each tractor will contain the correct belt and lift links. It is important that dealers store this bag until such time as a mower is installed on the tractor. In the event a mower is not delivered with a tractor, the parts bag should be delivered to the tractor purchaser for future use in mounting a mower deck.

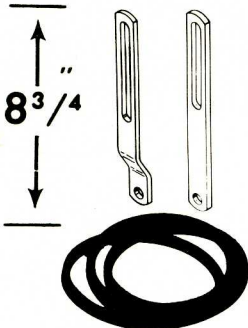

The sketches below illustrate the correct belts and lift links appropriate for mounting J40, J44, J45 and J46 mowers on the various tractor models:

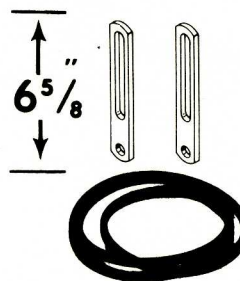

With models 210, 220, 222, 224
2 Short straight links
Part No. C18315
1 Short Belt
Part No. C23358

With model 444
2 Long straight links
Part No. C25703
1 Long belt
Part No. C23359

With models 446 and 448
1 Long offset link
Part No. C25702
(For right side installation)
1 Long straight link
(For left side installation)
Part No. C25703
1 Long belt
Part No. C23359

With loader tractors
2 Short straight links
Part No. C18315
1 Short (special) belt
Part No. C23808

NOTE: All clevis pins, washers and safety pins required for mower installation will be packed with mowers.

Since nearly all tractor units are equipped with mowers, we feel this change will simplify mower installation and insure that each tractor is furnished with the correct lift links and mower drive belt.

Mower installation procedure remains the same as outlined in the current mower Operator's Manual furnished and packed with each mower deck.
